
KMF MEDIA

Website Rebuild -- Complete Product Specification

A full-stack, AI-powered music marketing platform

AI-Powered | Data-Driven | Artist-First | Conversion-Optimised

Prepared by: Vidit Vaibhav | Fullstack Developer / GenAI Integration -- EPAM Systems

Prepared for: Sourav Kumar Yadav (Krantiveer) | Founder & CEO, KMF Media

Version 4.0 | June 2026

14	Summary	25

01 Project Overview

KMF Media has been growing for 5 years and has real credibility -- 100M+ streams, 2,000+ artists, collaborations with Zee Music, Saregama, and Meet Bros, plus promotions for Aditya Rikhari, Riar Saab, Gajendra Verma, and Shubh. The current website does not reflect any of this. It is a basic PHP site with placeholder Spotify links, default-avatar testimonials, and zero conversion mechanics.

The new KMF Media is not just a redesign -- it is a product. Artists land, see credibility immediately, sign up, run an AI-powered Spotify Analyzer from their dashboard, pick a package, pay, and get promoted. All without a sales call.

Tech Stack	Design Direction
Frontend: Next.js 14 (App Router) Backend: FastAPI (Python) L	Dark luxury -- deep blacks, gold accents Inspired by: Apple Music AI Spotify

02 Complete Site Map

Route	Page	Purpose
/	Homepage	Primary conversion -- builds trust, drives to signup
/about	About KMF	Founder story, company history, mission, team, timeline
/services	Services Hub	Overview of all 8 services with filter tabs
/services/spotify	Spotify Plans	3-tier Spotify packages + Razorpay (login required)
/services/youtube	YouTube Plans	3-tier YouTube packages + Razorpay
/services/reels	Reels Promo	Instagram Reels packages + Razorpay
/services/meta-ads	Meta Ads	Facebook + Instagram advertising service
/services/google-ads	Google Ads	Google search + display ad management
/services/press-release	Press Release	PR writing and media distribution
/services/consultation	Consultation	1-on-1 strategy session booking
/services/distribution	Distribution	Worldwide distribution via Tunfry partner
/portfolio	Portfolio	Case studies, label collabs, artist results, campaign cards
/artists	Artists	Bollywood credibility section + full artist roster
/competition	Competition	Monthly contest, entry form, countdown, hall of fame
/blog	Blog	SEO article listing -- 90+ migrated posts + ongoing
/blog/[slug]	Blog Post	Individual article with full SEO + structured data
/login	Login / Signup	Supabase Auth -- email/password + Google OAuth
/dashboard	Artist Dashboard	Spotify Analyzer, campaigns, stats, package recommender
/admin	Admin Panel	Full site management -- content, orders, blog, competition
/contact	Contact	Inquiry form, WhatsApp, map, social links
/privacy	Privacy Policy	Legal
/terms	Terms of Service	Legal including portfolio showcase clause

03 Page-by-Page Specification

3.1 Homepage /

The homepage has one job: turn a first-time visitor into a signed-up artist. Every section is sequenced to build credibility first, then introduce the product, then close.

Hero Section

Full-Viewport Cinematic Hero

Dark background with animated audio waveform visualizer -- SVG/canvas animation, reacts to scroll
Headline (staggered word-by-word reveal): 'Your Music. The Right Audience. Real Growth.'
Subtext: 'India's leading music marketing platform -- 100M+ streams delivered for 2,000+ artists'
Two CTAs: 'Get Started Free' (-> /login) and 'See How It Works' (smooth scroll down)
Floating music note particles in background -- subtle, atmospheric
Scroll indicator arrow at bottom center

Bollywood & Label Credibility Strip (Most Important Section)

Artist & Label Proof Rail

Auto-scrolling horizontal carousel -- pauses on hover. Two rows.
Top row -- Bollywood/DHH artists KMF has promoted:
Aditya Rikhari (Lajwab) | Riar Saab (Waade) | Gajendra Verma (Good Vibes Only)
Shubh (Supreme + Moves) | Krantiveer (Kagaz + Let's Talk)
Each artist card: real photo, name, song title, stream count badge (e.g. '5M+ streams')
Bottom row -- Labels: Zee Music, Saregama, Meet Bros, B-Town Music, Town Films, Myra Music, Indie Independent, KMF Production
Headline above: 'Trusted by Artists You Know'
Design must feel premium -- not a logo soup. Real photos, real song names, real numbers.

Animated Stats Counter

Trust Numbers

Four primary stats in a dark bar: 10,000+ Campaigns | 2,000+ Artists | 100M+ Streams | 5 Years
Count-up animation triggered by scroll Intersection Observer
Secondary row: 360 degree Marketing Team | 500+ YouTube Channels Monetized
Gold number highlights on dark background

Monthly Artist Competition Banner

Competition -- Community & Conversion Driver

Full-width section with own visual identity -- trophy icon, warm gradient accent strip
Headline: 'Win a Full Promotion Campaign -- Completely Free'
Prize: Winner receives Spotify Playlist Magic package (Rs. 11,000 value) + KMF social shoutout + blog feature
How to enter: Sign Up -> Submit Spotify link + genre -> Wait for results
Live countdown timer to current month's deadline
Previous winners showcase: artist name, winning track, streams gained after promotion
CTA: 'Enter This Month's Competition' -> /competition (requires login)
Social proof: 'Join 500+ artists who've competed so far'

How KMF Works -- 3-Step Process

Process Explainer

Step 1: Sign Up & Analyze -- Create free account, paste your Spotify link, get AI-powered growth insights
Step 2: Choose Your Plan -- Pick from packages matched to your genre and current stream count
Step 3: Watch Your Music Grow -- We pitch playlists, run campaigns, you see results in your dashboard
Horizontal step flow with icons and connecting line -- visual and scannable
CTA below: 'Start for Free -- No Credit Card Needed' -> /login

Services Overview -- 8 Cards

Service Grid

Spotify Promotion | YouTube Promotion | Instagram Reels | Meta Ads
Google Ads | Press Release | Marketing Consultation | Music Distribution
Each card: icon, title, 2-line description, 'Learn More' link, starting price
Section CTA: 'View All Services & Pricing' -> /services
Trust bar: 'All promotions are 100% organic -- no bots, no fake plays'

Testimonials Carousel

Artist Testimonials

Real testimonials with real artist photos -- not default-avatar.png
Each card: artist photo, name, genre tag, quote, 5-star rating
Rotating carousel -- auto-advance every 5 seconds, manual navigation dots
Min 6 testimonials: Akshay Pandey, Pritam Arora, Sakshi Garg, Suraj Arora, Drishti Jain, Rahul Mishra
Headline: 'What Artists Say About Working With KMF'

Blog Preview

Latest Articles (3 Cards)

3 most recent blog posts -- thumbnail, category tag, title, 2-line excerpt, read time, date
KMF already has 90+ posts -- all will be migrated. These rotate automatically.
CTA: 'Read All Articles on Music Marketing' -> /blog

Smart Package Recommender + Song Link Field [ONE widget -- bottom of homepage]

This is a single widget on the homepage -- it serves two purposes depending on the artist's state

PLACEMENT: Positioned at the bottom of the homepage, above the final CTA. Position on page is configurable.

STATE 1 -- Artist has NOT yet purchased a package (pre-payment):

The widget acts as the Smart Package Recommender.

Artist pastes their Spotify / YouTube song link into the field.

If NOT logged in -> prompt: 'Log in to get your personalised package recommendation'

A modal appears with 'Sign Up Free' and 'Log In' CTAs.

If logged in -> the song link is analysed and the artist is taken to the package recommender in their dashboard, with the song pre-loaded and AI recommendation ready.

STATE 2 -- Artist HAS purchased a package but has NOT yet submitted their song link:

The same widget transforms into the song link submission field.

Copy: 'Your [Package Name] campaign is ready! Paste your Spotify/YouTube link below to activate it.'

Artist pastes the link and clicks 'Activate Campaign' -- one action, campaign starts.

A pop-up also fires if the artist logs in without having submitted their link:

'You haven't sent us your song link yet -- your campaign is waiting!'

Widget disappears from homepage once the link is submitted.

Design: dark card with gold border, subtle glow -- feels premium, not a bland form.

These are NOT two separate features. It is ONE input field with two contextual states.

Final CTA Section

Homepage Closer

Dark full-width section: gold headline 'Ready to Amplify Your Music Career?'

Subtext: 'Join 2,000+ artists who trust KMF Media for real growth on Spotify and YouTube'

Two CTAs: 'Get Started Free' and 'Talk to Our Team'

WhatsApp click-to-chat button: +91 9220545506

3.2 About /about

The About page must tell Sourav's personal story powerfully. He is an independent artist who built a marketing company because he felt the pain firsthand. That authenticity is the credibility.

About Page Sections

Hero: 'We Are More Than a Music Marketing Agency' -- dark full-width with founder/team image

Founder Story: Sourav Kumar Yadav aka Krantiveer -- how he started as an artist, why he built KMF in 2020

Spotify Embed: Krantiveer's artist profile embedded -- proof he is a real artist, not just a marketer

Mission & Vision: clean icon cards, not just text blocks

Company Timeline: 2020 to 2026 -- visual horizontal progress bar style with key milestones

Core Values: Passion | Strategy | Growth | Artist First -- each with icon and short description

Stats row: 100% Client Satisfaction | 48hr Response Time | 2K+ Artists -- animated counters

Why Choose KMF: 6 differentiator cards

(Customized Campaigns, Result-Driven, Artist Growth Focus, Professional Promotion, Dedicated Support, Smart Marketing)

CTA: 'Start Your Music Growth Journey' -> /login

3.3 Services /services & Sub-Pages

Services Overview Hub (/services)

Hero: 'Performance-Focused Music Promotion -- Built for Independent Artists in India and Beyond'

Filter tabs: All | Streaming | Social Media | Advertising | Other

8 service cards in grid: icon, name, 2-line pitch, starting price, 'Learn More' CTA

Spotify Promotion /services/spotify

Package	Price	Streams	Timeline	What's Included
Tester Bag	Rs. 5,500	10K+	7-10 days	Indian targeting, UGC playlists
Playlist Magic	Rs. 11,000	20K+	14 days	Curated, genre-specific playlists
Brand Builder	Rs. 35,000	100K+	21-30 days	30K+ monthly listeners, premium placement

- CTA on each package: 'Get Started' -- requires login -> Razorpay payment
- Genre targeting: Hindi Pop, Hindi Rap, Punjabi, Electronic, Indie, and more
- FAQ: how it works, real vs fake streams, refund policy, reporting

YouTube Promotion /services/youtube

Package	Price	Views	Likes	What's Included
Testers Bag	Rs. 5,000	20K+	1K+	Location/interest targeting
Fan Finder Gold	Rs. 25,000	100K+	5K+	Advanced analytics, audience insights
Brand Builder	Rs. 1,20,000	1M+	30K+	2K+ comments, 2K+ subscribers

- Targeting options: location, age, gender, interest, language, music lovers audience

Reels Promotion /services/reels

Package	Price	Pages	Reach	What's Included
Testers Bag	Rs. 10,000	10 big + 30 micro pages	100K+	Genre-specific page selection
Viral Vision	Rs. 35,000	50 big (100K+ followers)	500K+	Genre targeting, daily reporting
Trending Assured	Rs. 1,20,000	200 big (500K+ flwrs)	2M+	Trending guarantee, 7-10 day run

- Content creation add-on: Rs. 15,000 for professional Reel editing

Other Services

- Meta Ads (/services/meta-ads): Facebook + Instagram targeted advertising -- contact for quote
- Google Ads (/services/google-ads): Search and display campaign management -- contact for quote
- Press Release (/services/press-release): Professional writing + distribution to music blogs and media
- Consultation (/services/consultation): Calendar booking for 1-on-1 strategy call with KMF team
- Distribution (/services/distribution): Worldwide release via Tunfry partner

3.4 Portfolio /portfolio

The current portfolio page is text-only with no real campaign data. The new version tells real stories with real numbers.

Portfolio Page Spec

Hero: 'Real Campaigns. Real Artists. Real Results.'

Filter tabs: All | Spotify | YouTube | Reels | Meta Ads | Branding

Campaign Cards: artist name + photo, service type, before/after numbers (e.g. '2K -> 50K streams'), duration, platform

Featured Case Study: Krantiveer's 'Kagaz' -- full story with challenge, strategy, results, visuals

Label Collaborations strip: Zee Music, Saregama, Meet Bros, B-Town Music, Town Films, Myra Music, Indie Independent

Artist Roster grid: Gold Doz, Patang, Zevar, SMR, MUSICMIND, VENUM, Vishesh Malik, Safarr, Krantiveer

Each card: photo, genre, streams achieved via KMF

Testimonials woven between sections

CTA: 'Get Results Like These' -> /login

3.5 Artists /artists

Artists Page Spec

Hero: 'The Artists Behind the Streams'

Bollywood/DHH section at top -- large premium cards:

Aditya Rikhari (Lajwab) | Riya Saab (Waade) | Gajendra Verma (Good Vibes Only)

Shubh (Supreme + Moves) | Krantiveer (Kagaz + Let's Talk)

Each card: real photo, song name, stream count, embedded Spotify player

KMF Artist Roster -- filterable grid by genre and platform:

Each roster card: photo, name, genre tag, promoted track, streams gained via KMF

Artist's blog (if submitted and published) linked from their card

Admin-manageable: add/remove artists from admin panel at any time

CTA: 'Join Our Artist Roster' -> /login

3.6 Monthly Competition /competition

Competition Page -- Entry Section

Hero: 'The KMF Monthly Artist Competition -- Win Free Promotion'

Prize: Spotify Playlist Magic package (Rs. 11,000 value) + KMF social shoutout + blog feature article

How to enter: Login/Signup -> Submit Spotify track link + genre -> Done

Rules: one entry per artist per month, track must be on Spotify, any genre

Live countdown timer to submission deadline

Current entries: anonymised list of this month's submitted tracks with genre tags

CTA: 'Enter Now -- It's Free' (requires login)

Social proof: 'Join 500+ artists who've competed so far'

FAQ: eligibility, winner selection process, announcement date

Past Winners Hall of Fame [ALWAYS VISIBLE on frontend -- no login required]

- A dedicated 'Hall of Fame' section lives permanently on the /competition page, scrollable below the entry section
- **Publicly visible to everyone** -- no login required -- maximum aspirational impact on visitors
- Each winner card: artist name, winning track (with Spotify embed/link), month won, streams gained post-promotion
- Visual: gold trophy icon on each card, dark premium card design consistent with site aesthetic
- Sorted most recent first -- perpetual archive of ALL past winners
- Admin adds each winner from the admin panel after announcing -- auto-appends to the Hall of Fame
- Admin also uploads post-promotion stream stats to the winner card (shows what winning actually does)

- Social sharing buttons per winner card: 'Share on Instagram / WhatsApp'
- Builds aspirational FOMO: 'Look what winning did for them. Enter now.'

3.7 Blog /blog & /blog/[slug]

KMF already has 90+ blog posts -- a significant SEO asset. All must be fully migrated and preserved.

Blog Listing /blog

Listing Page

Hero: 'KMF Music Marketing Blog -- Expert Insights for Growing Artists'

Category filter tabs: All | Spotify | YouTube | Social Media | Ads | Artist Strategy | Industry News

Search bar with live filtering

Featured article at top -- large card with thumbnail, title, excerpt, read time

Article grid: thumbnail, category tag, title, 2-line excerpt, date, read time -- 6 per page

90+ existing posts migrated from PHP CMS to Supabase DB -- all slugs, content, thumbnails preserved

Sidebar: Popular posts, Newsletter subscribe, Category list

Blog Post /blog/[slug]

Individual Post

SEO-structured: H1 title, H2/H3 subheadings, meta description, OG image, canonical URL

Author section, publish date, last updated date

Auto-generated Table of Contents sidebar from headings

Related articles at bottom (same category)

Share buttons: WhatsApp, Twitter/X, Facebook, LinkedIn, Copy Link

CTA mid-article and end: 'Promote Your Music with KMF' -> /services

Article schema (JSON-LD) for Google rich results

Estimated read time displayed

AI Blog Enhancer (Admin Tool -- existing feature)

Claude API -- Admin Blog Enhancer

Admin pastes raw draft text into the admin blog editor

Clicks 'Enhance with Claude AI' button

Claude rewrites with proper H1/H2/H3 SEO structure, keyword-rich intro, well-organised body, strong conclusion

Claude returns: suggested meta description (under 160 chars), SEO slug, 5 keyword tags, estimated read time

Admin reviews output, edits if needed, then publishes

Claude writes in KMF's voice: authoritative, helpful, artist-focused -- not generic or salesy

This powers KMF's entire admin content pipeline -- saves hours per article

Artist Blog Submission Flow [NEW]

Artist-Initiated Blog for Their Release -- See Section 07 for Full Spec

From the /dashboard, artist clicks 'Write a Blog for My Release'

Fills a short form: song story, mood, uploads 2-5 images

Submission goes to admin panel Blog Submission queue

Claude AI generates the full 800-1200 word blog post from the artist's input

Admin reviews, approves (or edits), then publishes on KMF blog

Artist notified with live blog URL -- blog linked from their /artists profile card

3.8 Login & Signup /login

Authentication

Clean minimal dark-theme page -- toggle between Login and Signup on same screen

Signup: Full Name, Email, Password, Artist Name (optional), Genre (dropdown)

Login: Email + Password, 'Continue with Google' OAuth option

After signup -> redirect to /dashboard with welcome state triggered

After login -> redirect to /dashboard

Forgot password: email-based reset via Supabase Auth

All token management handled by Supabase -- no custom auth logic needed

Monthly Competition Participation Link [NEW -- on Login/Signup page]

- Below the main login/signup form, a secondary callout section appears:
- 'Competing in this month's KMF competition? Share your entry link to get support!'
- Artist can access and copy their unique participation/sharing link from here
- Shareable URL format: kmfmedia.com/vote/[artist-slug]-[month-year]
- Artist shares this on Instagram, WhatsApp, Twitter to attract votes and streams
- Non-logged-in visitors clicking the link see the track entry and are funneled to sign up
- Drives viral organic growth through artist's own networks

3.9 Artist Dashboard /dashboard

Where artists live after login. The core product experience -- Spotify Analyzer, campaign tracking, stats, and package recommendation all happen here.

Dashboard Home

Overview Panel

Welcome: 'Welcome back, [Artist Name]. Here's where your music stands today.'

Quick stats row: Active Campaigns | Streams This Month | Playlists Pitched | Member Since

Recent activity feed: 'Your track was pitched to 5 playlists -- 3 accepted'

Quick actions: 'Analyse a Track' | 'Buy a Package' | 'View Campaign Status'

Song Link widget alert: if payment done but link not submitted, dashboard shows the same prompt as the homepage widget (see Sec 3.1 -- ONE unified widget, two states)

Monthly Competition Card: option to submit song for current month's competition + copy participation link

Growth Report notification: if admin has uploaded a new report -- 'Your results for [track] are ready!'

Spotify Analyzer -- Core Feature (Full 7-Step Flow)

Step	What Happens
1 -- Paste Spotify URL	Artist enters their Spotify track link in the dashboard input field
2 -- Backend Pulls Track Data	Server-side Spotify Client Credentials call -- fetches track name, artist, album art, popularity score, available markets
3 -- Select Genre & Audience	Dropdown: Genre (Hindi Pop / Hindi Rap / Punjabi / Indie / Electronic / etc.) + Target Audience (Indian / Global / Other)
4 -- Claude Analyses the Track	Claude receives track metadata + genre + target audience. Searches playlist DB, applies weightage logic per package
5 -- Results Displayed	Song card with album art + current stats. 3 package cards with projected stream numbers. Claude recommendation
6 -- Artist Picks Package & Pays	Picks package -> Razorpay modal -> on payment.captured webhook -> order created -> campaign marked Active
7 -- Post-Purchase Email	Personalised email via Claude: 'Hi [Name], here's what happens next for [Track Name]... We'll pitch to [playlist type]'

Smart Package Recommender + Spotify Analyzer (Clubbed AI Flow)

These two tools are experienced as ONE seamless flow by the artist. The Smart Package Recommender collects the artist's vibe and budget. The Spotify Analyzer then calculates exact cost and predicted streams per recommended package. See Section 04 for the full detailed specification of both tools.

Package Recommender -- Three Types Available Inside the Recommender

SPOTIFY PACKAGE RECOMMENDER (PRIMARY): playlist pitching, curator outreach, stream growth

YOUTUBE PACKAGE RECOMMENDER: views, subscribers, YT Shorts placements, influencer features

PREMIUM PACKAGE RECOMMENDER: Spotify + YouTube + Instagram Reels (all platforms combined)

Custom / Enterprise Option: 'Have a bigger budget or unique needs? Let's talk.'

-> Artist clicks 'Connect with Team' -> scheduling page (Cal.com) -> books a call with KMF team

-> Post-call: team sends a custom Razorpay payment link

Smart Package Recommender -- Claude's Output

Plain-language recommendation with reasoning:

'Based on where you are right now, Playlist Magic gives you the best chance of hitting 20K+ streams without over-investing. Here's why...'

Short, direct, no-fluff -- with a 'Buy Now' CTA

Eliminates decision paralysis when choosing between packages

Spotify Analyzer data auto-populates each card: cost breakdown + predicted stream range

My Campaigns

Campaign Tracker

All purchased campaigns: package name, track, status (Pending / Active / In Progress / Completed), start date, expected delivery
Progress indicator per campaign
Streams gained counter -- updates as campaign progresses
Growth Report card: when admin uploads the report, 'View Your Results' button appears
Support button per campaign: opens WhatsApp or email thread with KMF team

Spotify Stats (Phase 3 -- Post-OAuth)

Live Artist Stats

Artist connects Spotify via OAuth -- we pull live data:
Monthly listeners (current and trending) | Total streams on promoted tracks
Playlist appearances -- name and follower count of each
Stream growth chart -- last 30 days (line chart)
Top markets -- where listeners are coming from (map or bar chart)

3.10 Admin Panel /admin

Sourav and team manage the entire platform from here. No code changes needed for day-to-day site management.

Dashboard Overview

At-a-Glance Stats

Total artists registered | Campaigns this month | Revenue this month | New signups today
 Recent orders feed with quick-action buttons (View / Activate / Complete)
 Pending song link submissions -- artists who paid but haven't submitted their track link yet
 Blog approval queue -- AI-generated blogs from artist submissions awaiting review
 Unread contact form submissions

Content Management

Site Content Control

Homepage: Update hero image, artist strip content, stats numbers
 Artists page: Add/remove artists from Bollywood strip and main roster -- upload photo, name, song, stream count
 Testimonials: Add/edit/remove with photo upload
 Services: Edit package names, prices, feature lists -- no code needed

Playlist & Package Management

Playlist DB & Weightage System

Add playlists to DB: name, genre_tags[], follower_count, platform
 weightage_tester | weightage_playlist_magic | weightage_brand_builder
 Weightage determines projected streams contribution per package -- update as follower counts change
 Enable/disable individual playlists and full packages
 View playlist performance history
 Configure Smart Package Recommender scoring weights per package type (Spotify / YouTube / Premium)

Order & Payment Management

Orders Dashboard

All Razorpay orders: artist name, track, package, amount, date, payment status
 Campaign status management: Pending -> Active -> In Progress -> Completed
 Song Link Tracker: clearly flags campaigns awaiting song link submission
 Notes field per order for team communication
 Export orders as CSV for monthly reporting
 Manual order creation for WhatsApp/offline sales

Growth Report Upload [NEW]

Post-Campaign Reporting from Admin

After campaign ends, admin opens the campaign record and clicks 'Upload Growth Report'
 Input fields: Streams Gained | Views Gained | Playlist Additions | Influencer Reach | Peak Day | Key Notes
 System auto-generates a formatted PDF report card for the artist
 Admin can add a personalised note or next-step recommendation
 On save: artist is notified immediately (email + dashboard banner) that their report is ready
 Artist can download the full PDF report from their dashboard
 Auto-comparison generated: 'We predicted X streams -- you got Y streams (+Z%)'
 Claude generates a personalised campaign summary narrative for the artist's dashboard

Blog Management

Blog Control Panel

Create post: title, rich text body editor, thumbnail upload, category, tags, meta description, slug
AI Enhance button: Claude rewrites draft + auto-fills meta description, slug, tags
Artist Blog Submissions queue: review AI-generated blogs from artist ideas
Side-by-side view: artist's original input vs. Claude-generated blog
Inline editor: admin makes minor edits before approval
Approve / Request Changes / Reject workflow controls
Scheduled Publishing: publish immediately or set a specific date/time
SEO Preview: meta title, description, keyword suggestions from Claude
Edit/delete/schedule existing posts
View by status: Published | Draft | Scheduled | Pending Artist Submission Approval

Competition Management

Monthly Competition Controls

Set current month's deadline and prize details
Review all entries: artist name, email, track link, genre, submission date
Mark winner -- auto-notification email sent to winner via Claude
Archive past competitions to Hall of Fame -- auto-updates /competition frontend page
Upload winner's post-promotion stream stats to their Hall of Fame card

User Management

Artist CRM

All registered artists: name, email, signup date, campaigns purchased, total spend
Verify or deactivate accounts
View any artist's analyser history
Manual email sending for announcements

3.11 Contact /contact

Contact Page

Contact details: +91 9220545506 (Mon-Fri 9am-6pm) | info@kmfmedia.com | Dwarka Sector 23, New Delhi 110077
Contact form: First Name, Last Name, Email, Phone (optional), Subject dropdown
(Spotify Promotion / YouTube / Reels / General Inquiry / Partnership), Message, simple math CAPTCHA
WhatsApp direct chat button -- prominent green button: 'Chat With Us on WhatsApp'
Google Maps embed for office location
Social links: Facebook (kmfmedia.in), Instagram (@kmfmedia.in), Twitter/X (@KmfMedia)
Response time callout: 'We respond within 24 hours on business days'

04 AI Tools: Smart Package Recommender + Spotify Analyzer

These two AI tools are the core intelligence engine of the KMF Media platform. They are clubbed together into one seamless flow: the Smart Package Recommender collects the artist's budget and song vibe, and the Spotify Analyzer then calculates exact cost per package AND predicts the stream/view count the artist can expect. The artist experiences it as one intelligent conversation, not two separate tools.

4.1 Smart Package Recommender

Purpose: Recommend the best promotion package based on the artist's budget, platform priority, and song vibe.

Artist Vibe Form (multi-step)

Form Field	Input Type	Options
Song Genre	Dropdown	Hindi Pop, Hindi Rap, Punjabi, R&B, Electronic, Folk, Indie, Other
Song Mood / Vibe	Multi-select	Upbeat, Chill, Romantic, Motivational, Dark/Moody, Party, Devotional
Target Audience	Dropdown	Indian, Global, Both
Target Geography	Dropdown	Pan-India, Tier 1 Cities, Regional, Global
Campaign Goal	Dropdown	Streams Growth, Playlist Pitching, New Audience, Label Showcase
Budget Range	Dropdown	Rs. 2,000-5,000 / Rs. 5,000-15,000 / Rs. 15,000-50,000 / Rs. 50,000+
Release Status	Dropdown	Already Released, In 1-7 days, In 1-4 weeks, Planning Phase
Platform Priority	Dropdown	Spotify Only, YouTube Only, Both, Spotify + YouTube + Reels

AI Recommendation Scoring (Claude API)

```
Package_Score = (Budget_Fit x 0.35)
+ (Genre_Platform_Match x 0.25)
+ (Audience_Reach_Fit x 0.20)
+ (Campaign_Goal_Align x 0.20)

Output: Top 2-3 recommended packages, ranked by score
Each with: what's included, price, predicted reach, and why Claude recommends it
```

Package Type Options Inside the Recommender [NEW]

Package Type	What It Covers	Best For
Spotify Package [PRIMARY]	Playlist submissions, curator pitching, Spotify ad credits, stream growth	Artists focused on Spotify stream growth
YouTube Package	YouTube promotions, influencer features, YT Shorts, view growth	Artists building YouTube presence
Premium Bundle	Spotify + YouTube + Instagram Reels (all platforms combined)	Maximum cross-platform exposure
Custom / Enterprise	Tailored scope -- artist books a call with KMF team via scheduling link	Large budgets, labels, unique needs

Custom Package -- Schedule a Call Flow

Artist selects 'Custom' or has budget Rs. 50,000+ ->
Page: 'Tell us more about what you need -- our team will build a custom campaign for you'
Cal.com scheduling widget: artist picks date + time for a call with KMF team

Confirmation email auto-sent with meeting details

Post-call: KMF team creates a custom quote and sends a Razorpay payment link

4.2 Spotify Analyzer

Purpose: Calculate exact cost per package AND predict stream/view count growth for each recommended package.

Cost Calculation Engine

```
Package_Cost = (Playlist_Submissions x Rate_Per_Pitch)
+ (Influencer_Reposts x Rate_Per_Repost)
+ (Ad_Spend_Budget x Platform_Markup)
+ (KMF_Management_Fee)
```

Rates vary by: Platform | Audience tier (macro/micro/nano) | Geography

Stream / View Prediction Model

```
Predicted_Streams = Base_Streams_Per_Package
x Genre_Multiplier
x Audience_Match_Score
x Platform_Trend_Factor
```

```
Playlist_Contribution = SUM(playlist.weightage_[package_tier] for playlists in campaign)
```

Example output on a package card:

Spotify Playlist Magic (Rs. 11,000):
Estimated Streams: 15,000 - 25,000 in 14 days
Playlists Pitched: ~35 curated playlists
Confidence: High (based on 124 similar campaigns)

Premium Bundle (Rs. 79,999):
Estimated Streams: 1,00,000+ | Views: 80,000+
Platforms: Spotify + YouTube + Instagram Reels
Confidence: High (based on 41 similar campaigns)

Unified UX -- The Artist Sees ONE Flow, Not Two Tools

Step 1: Artist fills Vibe Form (genre, mood, budget, goal, platform priority)

Step 2: Smart Package Recommender outputs top 2-3 packages with Claude's reasoning

Step 3: Spotify Analyzer data auto-populates each package card:

- Cost breakdown (what the money covers in detail)
- Predicted streams/views range
- Confidence score (based on historical campaign data)
- Partial list of playlists/channels being pitched (full list unlocked after purchase)

Step 4: Artist selects a package -> Razorpay checkout -> Campaign created

The artist never sees a separate 'Spotify Analyzer' or 'Package Recommender' screen.

It is one intelligent, data-backed recommendation experience.

05 Package Types & Pricing Engine

5.1 Spotify Packages (Primary)

Tier	Price	Playlists Pitched	Predicted Streams	Timeline
Tester Bag	Rs. 5,500	10-15 UGC playlists	10K+ streams	7-10 days
Playlist Magic	Rs. 11,000	20-30 curated playlists	20K+ streams	14 days
Brand Builder	Rs. 35,000	60+ curated, tier-1 playlists	100K+ streams	21-30 days

5.2 YouTube Packages

Tier	Price	What's Included	Predicted Views
Testers Bag	Rs. 5,000	Location/interest targeting, basic analytics	20K+ views
Fan Finder Gold	Rs. 25,000	Influencer collabs, YT Shorts placements, advanced analytics	100K+ views
Brand Builder	Rs. 1,20,000	Top creators, sustained campaigns, 2K+ subscribers	1M+ views

5.3 Premium Bundle (Spotify + YouTube + Reels)

Bundle Tier	Price	Platforms	Combined Predicted Reach
Standard Premium	Rs. 49,999	Spotify + YouTube	1,20,000+ combined streams/views
Full Premium	Rs. 79,999	Spotify + YouTube + Reels	3,00,000+ combined reach
Label Premium	Rs. 1,50,000+	All platforms + Press	10,00,000+ combined reach

5.4 Playlist Weightage System (Pricing Foundation)

Each playlist in the DB has three weightage values:

- weightage_tester = stream contribution to Tester Bag
- weightage_playlist_magic = stream contribution to Playlist Magic
- weightage_brand_builder = stream contribution to Brand Builder

Projected_Streams_[package] = SUM(playlist.weightage_[package] for all playlists in campaign)

Final_Package_Price = Base_Rate
+ (Platform_Multiplier x Scope_Units)
+ Geography_Premium (Global: +40% | Pan-India: +20%)
+ KMF_Management_Fee

06 Release Scheduling & Marketing Automation

Artists often finalise their Spotify or YouTube release dates in advance. KMF Media allows artists to schedule and pre-pay for their marketing campaign before the song goes live. The moment the artist submits their live song link, the campaign activates.

6.1 Pre-Release Campaign Setup Flow

```

Artist logs in -> 'Schedule a Release Campaign'
|
v
Fills Artist Vibe Form -> AI recommends packages + stream predictions
|
v
Selects package -> Pre-payment via Razorpay
|
v
Payment confirmed -> Campaign status: 'Scheduled'
|
v
Homepage + Dashboard shows: 'Submit your song link when it goes live'
|
v
Artist submits song link on release day (Spotify or YouTube URL)
|
v
Campaign status changes to: 'Active' -- marketing begins immediately
|
v
Campaign runs -> Admin tracks performance
|
v
Campaign ends -> Admin uploads growth report
|
v
Artist notified -> views full results in dashboard

```

6.2 Song Link Submission -- Reminder System

The homepage widget (Section 3.1) is the primary song link submission point. It changes state after payment to show the activation field. Additional reminders ensure the artist cannot miss it.

- **Homepage Widget (STATE 2 -- primary):** The same Smart Package Recommender widget on the homepage changes to the song link submission field after payment. 'Your [Package Name] campaign is ready! Paste your link to activate it.'
- **Dashboard Alert Card:** Mirrors the homepage prompt inside /dashboard
- **Pop-up on Login:** If artist logs in with a paid pending campaign but no link submitted, a modal fires: 'You haven't sent us your song link yet -- your campaign is waiting!'
- **Email Reminder (automated):** 24 hours after payment if link is not yet submitted
- **WhatsApp Nudge (optional):** 48 hours post-payment if still not submitted

6.3 Campaign Status Lifecycle

Status	Meaning	Artist Action Required
Scheduled	Payment done, campaign configured, waiting for song link	Submit song link
Awaiting Link	Reminder active -- link not received after 24+ hours	Submit song link urgently
Active	Song link received, marketing underway	None -- KMF team working
In Progress	Playlists being pitched, campaigns running	Track in dashboard
Completed	Campaign ended, results being compiled by admin	View growth report
Report Available	Admin has uploaded full growth metrics	Download & review PDF

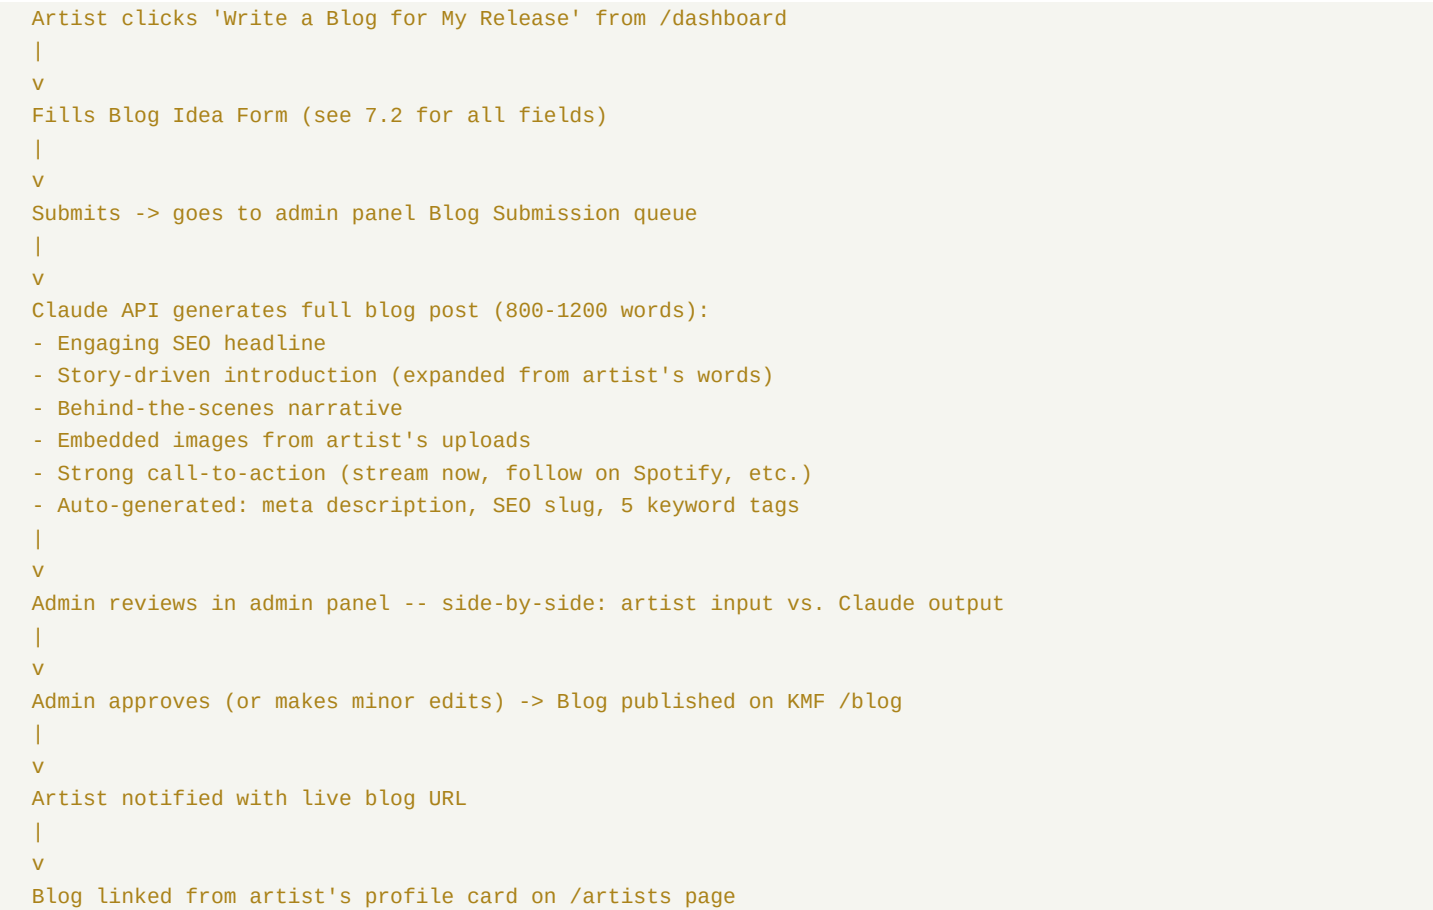

6.4 Post-Campaign Growth Report

- Admin uploads final growth metrics from admin panel once campaign ends
- Artist receives notification (email + dashboard banner): 'Your growth report for [Track Name] is ready!'
- Report includes: streams gained, playlist additions, listener geography, peak day performance, influencer activity summary
 - Comparison vs AI prediction: 'We predicted 20,000 streams -- you got 27,400 streams (+37%)'
 - Downloadable PDF report for the artist's records -- auto-generated by the system from admin inputs
 - Claude generates a personalised campaign summary narrative displayed in the artist's dashboard

07 Artist Blog Submission Flow [NEW]

Every release on the KMF Media platform can be accompanied by an AI-generated blog post that helps with SEO, storytelling, and artist brand building. The artist provides the core idea and images -- Claude builds the full article -- the admin reviews and publishes it.

7.1 End-to-End Flow

7.2 Blog Idea Form Fields

Field	Type	Purpose
Song Name	Text input	Blog title anchor and primary SEO keyword
Release Date	Date picker	Publication scheduling
Story Behind the Song	Long text area	Core narrative Claude expands into full article
Mood / Theme	Dropdown multi-select	Tone and style guidance for Claude
Message to Audience	Short text	Emotional hook and CTA direction
Uploaded Images (2-5)	File upload	Embedded in blog body
Social Handles	3 text inputs	Spotify, Instagram, YouTube -- linked in blog footer

7.3 Admin Blog Review Panel

- **Pending Queue:** all AI-generated blogs from artist submissions awaiting review
- **Side-by-side View:** artist's original input vs. Claude-generated blog, so admin can verify accuracy
- **Inline Editor:** admin can make minor edits (names, facts) before approval
- **Approve / Request Changes / Reject:** full workflow controls with artist notification on each action
- **Scheduled Publishing:** publish immediately or set a specific date/time
- **SEO Preview:** meta title, meta description, and keyword suggestions from Claude

08 Claude API Integrations -- 9 Features

Claude API (Anthropic) is used throughout -- not Gemini. Since this is a paid product, Claude is the right choice for reliability, quality, and consistency. Every integration below solves a real problem.

#	Feature	What Claude Does	Business Value
1	Spotify Analyzer	Track metadata + genre + target audience -> playlist DB we	Core product differentiator -- no In
2	Smart Package Recommen	Reads artist genre, vibe form, analyser history -> outputs pl	Reduces package analysis time, increases package
3	Stream Prediction Engine	Per package card: predicts stream/view range based on his	Turns purchase decision from leap of faith to
4	Post-Purchase Email	After Razorpay webhook: generates personalised email with	Reduces post-purchase email type, sets personal
5	Signup Welcome Email	After artist creates account: generates welcome message p	Sets premium tone from the very first interaction
6	Blog Enhancer (Admin)	Admin pastes raw draft -> Claude rewrites with SEO structu	Saves 2-3 minutes per article, improves the descrip
7	Artist Blog Generator	Takes artist's short idea + image descriptions -> generates	New SEO content at zero writing effort. Artistat
8	Competition Entry Feedbac	When artist submits their competition entry, Claude gives 2-	Engagement, constructive feedback. KMF actually c
9	Campaign Completion Rep	When admin uploads growth stats, Claude auto-generates p	Saves admin writing time. Gives artistic profess

09 Design System

Colour Palette

Token	Hex	Usage
BG Primary	#0A0A0A	Page backgrounds
BG Surface	#141414	Cards, panels
BG Elevated	#1C1C1C	Modals, inputs
Gold Accent	#C9A84C	CTAs, highlights, underlines, borders on hover
Green Success	#1DB954	Streams, success states
Text Primary	#F5F5F5	Headings, body text
Text Secondary	#888888	Captions, metadata, placeholders
Border	#2A2A2A	Card borders, dividers

Typography

Role	Font	Notes
Display / Hero	Playfair Display	Editorial, premium -- major headings
Body / UI	DM Sans	Clean and modern -- body text and UI labels
Numbers / Stats	Fira Code	Monospace, data-forward -- stream counts, prices

All fonts loaded via Google Fonts with font-display: swap for performance.

Animations & Motion

- **Hero:** waveform SVG animation on load, parallax on scroll
- **Stats:** count-up animation on Intersection Observer
- **Artist carousel:** CSS marquee, pauses on hover
- **Cards:** translateY(-4px) + gold box-shadow glow on hover
- **Page transitions:** 200ms fade-in
- **Section reveals:** staggered fade-up, 80ms delay between items
- **Analyser results:** skeleton loading -> smooth fade reveal

Component Standards

Component	Spec
Buttons Primary	Gold bg (#C9A84C), dark text, 8px radius, hover: scale(1.02)
Buttons Secondary	Outlined gold border, transparent bg
Buttons Ghost	Text only, gold on hover
Cards	#141414 bg, 1px #2A2A2A border, 12px radius, gold left accent on hover
Inputs	#1C1C1C bg, gold focus ring, 8px radius
Genre Badges	Pill shape, warm tones (Hindi/Bollywood), cool tones (Electronic)

10 Technical Architecture

Frontend -- Next.js 14

Architecture

App Router -- server components for SEO pages (homepage, blog, services, portfolio, about, artists, competition)
Client components for interactive features: dashboard, analyser, admin panel, auth forms, payment flow
next/image -- automatic WebP, lazy loading, responsive sizes
next-seo -- meta tags, OG images, Twitter cards on every page
next-sitemap -- auto-generated sitemap.xml and robots.txt
JSON-LD structured data: Article (blog), Organization (homepage), BreadcrumbList (all), FAQPage (services)
Tailwind CSS -- consistent design system via tailwind.config.js
Framer Motion -- page transitions and scroll-triggered section reveals
Deployed on Vercel -- automatic CI/CD from GitHub main branch

Backend -- FastAPI (Python)

API Server

Core endpoints:
POST /auth/verify | POST /analyze | GET /playlists | POST /orders/create
GET /dashboard/:userId | POST /admin/* | POST /blog/enhance | POST /blog/generate
GET /competition | POST /webhook/razorpay | POST /campaigns/submit-link
Spotify integration: server-side Client Credentials flow -- API key never in frontend
Claude API calls: ALL routed through backend -- API key never exposed to client
Razorpay: order creation server-side, webhook handler for payment.captured, signature verification
Email: Resend API -- welcome, post-purchase, competition, growth report notifications
Deployed on Render, Singapore region

Database -- Supabase (PostgreSQL)

Tables

users: id, email, full_name, artist_name, genre, created_at, spotify_connected
tracks_analyzed: id, user_id, spotify_url, track_name, artist_name, genre, target_audience, analyzed_at
playlists: id, name, genre_tags[], follower_count, platform, weightage_tester, weightage_playlist_magic, weightage_brand_builder, active
orders: id, user_id, track_id, package_type, amount, razorpay_order_id, status, song_link, created_at
campaigns: id, order_id, status, playlists_pitched[], streams_gained, admin_notes, growth_report_url, completed_at
blog_posts: id, title, slug, body, thumbnail_url, category, tags[], meta_description, read_time, published_at, status, submitted_by_user_id
blog_submissions: id, user_id, song_name, story, mood, images[], social_handles, submitted_at, status
competition_entries: id, user_id, spotify_url, genre, submitted_at, month_year, is_winner, streams_gained_after
Row Level Security: artists see only their own data. Admin role bypasses RLS.
Supabase Storage: artist photos, blog thumbnails, blog submission images

Payments -- Razorpay

Payment Flow

User selects package -> POST /orders/create -> Razorpay order created -> order_id returned to frontend

Frontend opens Razorpay checkout modal

On success: Razorpay POST /webhook/razorpay -> verify signature -> order in DB -> campaign created -> Claude email triggered

Supabase Realtime: dashboard updates live after payment confirmed

Pre-release: campaign created with status 'Scheduled' -> activates on song link submission

Manual order creation in admin for WhatsApp/offline payments

11 SEO Strategy

KMF already has 90+ blog posts -- a significant SEO head start. The new site must fully leverage this while adding a proper technical SEO foundation.

Technical SEO

- SSR/SSG for all public pages via Next.js App Router
- Unique meta title + description on every single page
- OG images auto-generated per page and blog post
- Canonical URLs everywhere
- sitemap.xml auto-generated and submitted to Google Search Console
- robots.txt: index public, noindex /admin and /dashboard
- Core Web Vitals targets: LCP < 2.5s, CLS < 0.1, FID < 100ms
- Schema markup: Article, Organization, BreadcrumbList, FAQPage
- HTTPS everywhere, clean URL slugs (no .php extensions)
- 301 redirects from all old PHP URLs to new routes

Content & Keyword Strategy

- 90+ existing posts fully migrated -- no SEO equity lost
- Primary targets: 'music promotion India', 'Spotify promotion India', 'music marketing agency India', 'playlist placement service'
- Each service page owns a commercial keyword
- Blog targets informational keywords: 'how to promote on Spotify', 'best music marketing 2026'
- Internal linking: service pages <-> relevant blog posts
- Claude AI Blog Enhancer ensures all new posts have proper SEO structure from day one
- Newsletter section on blog: build owned audience

12 Build Phases

No strict deadline. We build in phases so there is always something shippable. Each phase ends with a live, deployed version.

Phase 01 -- Foundation: Core Site & Design System

- Design system: Tailwind config, colour tokens, font loading, base component library
- Homepage -- all sections including Smart Package Recommender widget at bottom
- About page -- founder story, timeline, Spotify embed, mission, values
- Services overview + all 8 sub-pages with package details and pricing
- Portfolio page -- campaign cards, label strip, artist roster, featured case study
- Artists page -- Bollywood credibility section + filterable roster
- Competition page -- full spec: entry form, countdown, current entries, Hall of Fame (always visible)
- Contact page -- form, WhatsApp, Google Maps
- Legal pages: Privacy Policy + Terms of Service (with portfolio showcase clause)
- Basic SEO: meta tags, sitemap, 301 redirects from PHP URLs
- Vercel deployment with production domain

Phase 02 -- Auth, Dashboard, Analyser & Payments

- Supabase Auth: signup, login, Google OAuth, forgot password
- Monthly competition participation link on login page
- Artist dashboard: overview panel, quick actions, competition card
- Spotify Analyser -- full 7-step flow
- Smart Package Recommender -- clubbed with Spotify Analyser (all 3 package types + custom call option)
- Release scheduling + song link submission flow (all 5 touchpoints: homepage, dashboard, pop-up, email,

WhatsApp)

- Post-purchase email via Claude API
- Signup welcome email via Claude API
- Competition entry feedback via Claude API
- Order management in admin panel
- Playlist DB seeded with real playlists, genre tags, and weightages

Phase 03 -- Blog, Competition & Full Admin

- Blog listing + individual post pages with full SEO structure
- Migration of all 90+ existing blog posts -- slugs, content, thumbnails preserved
- AI Blog Enhancer in admin panel (Claude -- admin-side tool)
- Artist Blog Submission flow: idea form, Claude generation, admin approval queue
- Full admin panel: content management, playlist manager, order tracker, user manager
- Growth Report upload in admin -- PDF generation and artist notification
- Competition management: review entries, select winner, archive to Hall of Fame
- YouTube and Reels package Razorpay integration
- Claude campaign completion report generation

Phase 04 -- Live Stats, Polish & SEO Audit

- Spotify OAuth for live artist stats: monthly listeners, streams, playlist appearances, growth chart
- Full SEO audit: Core Web Vitals, schema validation, Google Search Console setup
- Mobile UX review -- every page on real devices
- Performance optimisation: image compression, lazy loading, code splitting
- OG image generation for blog posts
- Bug bash and final QA
- Admin guide for Sourav -- how to manage the site without dev help

13 Terms & Conditions / Portfolio Showcase Clause

KMF Media's platform includes a clear Terms & Conditions agreement that all artists must accept upon registration. A key clause covers KMF Media's right to showcase promoted content in their portfolio and marketing materials.

Portfolio Showcase Clause (within T&C at /terms)

By using the KMF Media platform to promote your music, you agree that KMF Media may reference and showcase your campaign results, stream growth metrics, and campaign details as part of their marketing portfolio, case studies, website, and pitch decks.

Your personally identifiable information (PII) will never be shared without explicit consent.

Artists can opt out of portfolio showcasing at any time by contacting support.

Opting out does not affect platform access or ongoing campaigns.

- All artists must accept T&C during registration (checkbox, cannot be skipped)
- T&C is accessible at all times from the footer of every page
- Artists can opt out of portfolio featuring while retaining full platform access
- Campaign metrics used in portfolio will be anonymised unless artist opts into full showcase
- Blog posts generated from artist submissions are credited to the artist by name
- Past competition winners showcased in Hall of Fame consent to this upon entering the competition

14 Summary

The current KMF Media site is a PHP brochure that undersells 5 years of real work. Sourav has promoted Bollywood artists, collaborated with Saregama and Zee Music, and delivered 100 million streams. None of that comes through on the current site.

The new KMF Media is a platform. Artists come in, get immediately impressed by the names and numbers, sign up, run the Spotify Analyser (which is seamlessly clubbed with the Smart Package Recommender), see Claude tell them exactly which package fits -- Spotify, YouTube, or Premium Bundle -- and how many streams to expect, pay via Razorpay, schedule their release, submit their song link, and get promoted. No back-and-forth required.

The blog stays and grows -- 90+ articles are a real SEO moat, and artists can now submit their own release blogs. The competition Hall of Fame is always visible on the frontend, building aspiration for every visitor. The admin panel gives Sourav full control with zero code changes. The 9 Claude API integrations are not gimmicks -- each one removes a real friction point or saves real time.

This is what KMF Media should have always been.

KMF MEDIA

Let's Make Your Music Move.

Spotify Analyser + Smart Package Recommender | Release Scheduling
AI Blogs | Competition Hall of Fame | Growth Reports | 9 Claude Integrations

Ready to build? Let's get started.
